Do you think we have had 75 years of peace?

Summary:
War is a crime against humanity. On the 75th Anniversary of the end of WW2 it is worth thinking about what we have allowed the rulers to do to fundamental freedoms and rights. We are very much still living in a war economy. If the money used for war was invested in peace there would be no need for chaos and war. Follow the money and it is very easy to see how the people of the world have been robbed, lied to and abused by the 0.1%.

75 Years Of Peace?? Get Real..!!

War exposes the worst of humanity: Manipulation of populations with propaganda; Profiteering by the financial empires and their war machines. Royalty and religions betraying their followers and countries.

Killing civilians is a crime against humanity.

Destroying peoples' homes and businesses is a crime against humanity.

Designing, manufacturing and using weapons of mass destruction is a crime against humanity.

Peace is not hard for people to bear. War is..!!

Dropping atomic bombs on Japan's people was a heinous abuse of power and a crime against humanity.

After the war Japan's constitution specifically limited its capacity for war. Every nation could put in place the same sort of limitations. It is just a matter of really respecting the right to life.

Just because something is technically possible does not mean it must be developed and implemented. Scientists and engineers can always build better killing machines. It is not compulsory to do so. Software and hardware companies can develop facial recognition and other population surveillance systems. Again - it does not have to be rolled out. How do we stop it? EASY..!! - RESPECT THE RIGHT TO PRIVACY and make it a crime against humanity..!!

If you are super-duper keen to use your face to log into your phones and computers, Apple and Google should make sure the bio-metric data remains under your control on your device. SIMPLE..!! The reason these simple protections are not put in place is because the government and corporations they serve do not care about your rights one little bit..!!!

Same story with digital money. If you must use it ... MAKE IT SAFE! Make it even better than cash. It's your money so no bank, company or government should be able to remove your funds without your authorisation. All transactions must be encrypted so that no-one besides you knows the details of the transactions. Only you have access to a decrypted statement. If you find a problem then you can make the appropriate inquiry with your bank. That is technically possible. Why isn't it done?

Hitler's and Stalin's secret police would have killed to have the surveillance structures now being rolled out in China and the West. How they would have loved to know the details of everyone their citizens contacted ... and everything they purchased.

The freedoms we thought our soldiers were fighting for have been patiently and gradually stripped from most peoples and countries.

A little research uncovers the uncomfortable truth. Have a look at Francis R. Conolly's documentary - JFK To 9/11: Everything Is A Rich Man's Trick. Even if only 80% is spot on it is frightening how an elite continues to manipulate and rob poorly informed populations.

Also worth checking out is Oliver Stone's series - The Untold History of the United States. Even if you don't agree with all his interpretations - the facts are very well presented.

Turmoil and hardship also can reveal the best of humanity. Many ordinary people did extraordinary things to look after their families, communities and fellow servicemen during WW2.

Do not let the "rulers" divide us. We are all human beings sharing this planet. Respect and accept the minor differences we have - they make our lives & culture interesting and better. The elite want the races, religions and sexes fighting each other. Divide and conquer is the age-old modus operandi. Don't buy into it..!!

The lessons of war should have been well taught and heeded by now. Too many still profit from chaos and war. Now is the time for peace and prosperity. There's never been a lack of money for war; we need a system that invests in peace, as John Curtin and Ben Chifley intended to with Australia's Commonwealth Bank after WWII.

It can be done but we will need to stand, unite and make it right. A good start would be putting in place a National Bank and a Sovereign Wealth Fund. No one need be unemployed in a nation where the fair go is the norm.

Another critical issue is to respect fundamental human rights, freedoms and responsibilities - see link below.

All we are saying is give peace a chance.
