

Bank Reform Now (BRN) Petition

We the undersigned call on the Australian people's House of Representatives and Senate to work together to instigate a powerful Royal Commission into the banking and finance system. Too many people in our country have had their lives decimated by predatory and unconscionable practices. Insurance scams, financial planner scandals, mortgage fraud, credit card rip offs, excessive fees and penalties are just the tip of the iceberg.

We demand the perpetrators of crimes face appropriate penalties including asset seizures and jail terms. We insist victims of financial system crimes are fully compensated. Only having real penalties for real crimes will stamp out a culture that encourages criminal and unethical behaviour.
